

About us:

Founded by regrouping the specific marine and aviation 3D modeling teams of long-established IT and CAD focused companies, MAX design has the domain expertise to address many aspects of 3D modeling for Yachts and Airplanes. We produce working models, execution drawings as well as renderings and animations.

Our extensive IT expertise ensures we are using the right resource for the job. That includes domain expertise, computer farming through networking and Virtual Private Networks (VPN).

The international management team has long years of experience in IT in India, as well as managing trans-national developments, coupled with personal interest in yachting and flying.
